A NEW EQUATION

The power of custom printed shipping boxes is in the hands of the small business or small project just as much as the big business or big deal. No longer relegated to the scale of thousands, it's possible to order as few or as many as you need.

Sustainability

We're conscious of the impact that production and consumption has on the planet. The corrugated we use is 50% or greater in recycled content and is 100% recyclable. Our materials are supplied by companies that are certified by SFI, the Sustainable Forestry Initiative, the largest single forest standard in the world.

Samples

Would it be helpful if you were able to see and touch our boxes before you printed and ordered hundreds or thousands? We can set you up with a sample pack of representative boxes to view quality. Then to take it one step further, order just one to check out fit, design and color. There's nothing quite like seeing it!

Special Requests

Are you not seeing everything you want? We're here to help.

- › Want a mask that extends to a flap or to the interior of your box?
- › Want to see a printed swatch of a particular color before ordering?
- › Do you have specific mailing or shipping instructions?

Of course, we keep prices low by standardizing certain aspects of production, but when special cases arise, we try to work with you to find a good solution.

Proudly manufactured in the United States.

SPECIFICATIONS

Material

Shipping boxes are made from 200# corrugated cardboard material. Structures are offered in B and E flute, which is sturdy enough for shipping safely, yet light enough to not add unnecessary bulk or an unattractive “ribbed” effect on the printing.

Boxes are uncoated white stock on the outside. Display mailers have white on the inside as well. Kraft paper or coated papers are not offered.

Ink

Our boxes are digitally printed in CMYK with a UV cure. We cannot match a PMS color. While our printers are calibrated to SWOP standards (the industry standard), no two digital printers are the same, so if color is important to you, as we suspect it is, we recommend asking a sales rep about receiving a Color Swatch Sample.

Lead Times

Our standard lead time is approximately ten days. Shipping is dependent on the UPS shipping option selected at checkout. Please allow an additional three to five days if you request a color swatch test.

We do not currently offer rush services; however, we will do our best to accommodate your deadline. Please chat with a customer service rep to see if we are able to meet your need.

Structure Types

We offer the following four structure styles in the 27 most common sizes:

- › **Shipper** is also referred to as slotted carton.
- › **Mailer** includes three closure styles that are also referred to as roll-tuck mailer, end-tuck mailer or ear lock mailer.
- › **Top-Open Box** includes square mailers and gift mailers with top-tuck closure style.
- › **Carry Handled Box** is also referred to as a gabled box.

DISPLAY MAILERS

When you are looking for maximum brand impact, mailers offer ease of assembly, maximum branding space on the exterior and an elegant “unveiling” process that adds to the overall customer experience. The standard mask includes printing on all six sides, plus flaps, for these tuck and roll style mailers. Display style mailers offer an inside print option on the white interior for an additional fee.
